SIGTBD'16

MAIN EVENT: 4/1 1 PM EST

sigtbd.csail.mit.edu

32-D449 (CSAIL Kiva)

SIGTBD, CSAIL's first annual conference in **TBD**, is the premiere forum for **all areas of computer science research**, including big data, machine learning, theory, programming languages, systems, networking and others.

SIGTBD's emphases includes innovative, elegant (to the point of simplicity) and creative approaches for solving problems that are not traditionally served by the academic community. These problem spaces may be obsolete or unrealistic even by academic standards and are often of debatable research taste. Each paper will include a graph that goes up and to the right.

If you have any questions, concerns, comments, or stories to share, you may easily reach the SIGTBD program committee via email (M-F 9am-2pm) at veryconference@csail.mit.edu. A reminder to all authors: SIGTBD employs a double-blind paper review process, and authors are prohibited from de-anonymizing their work, including via communications with the SIGTBD committee. Vague references to your submitted work, such as in form of poetic allusions or puzzles, are acceptable.

12:30 PM Registration / Opening remarks
1 PM Author presentations (Session A)
2:15 PM Author presentations (Session B)
3:30 PM Author presentations (Session C)
4 PM Awards ceremony
4:30 PM Student social (GSB)
