Abstract

Over the past decade, the number of opps showing main character energy has steadily risen. This has created an issue for those manifesting hot girl summers, with baddies who slay becoming an uncommon occurrence. Unc just dropped a new rizz-maxxing framework that is effective in making sure delulu is the solulu, and in doing so, prevents the Goats from taking any Ls.

1. Introduction

Every fumble is followed by being down bad for a situation-ship. This is known as a canon event. One specific major red flag is called rot girl winter. During this time, there is minimal popping off. As seen in Figure 1, it has been observed that a common solution for rot girl winter is to looksmax by mewing.

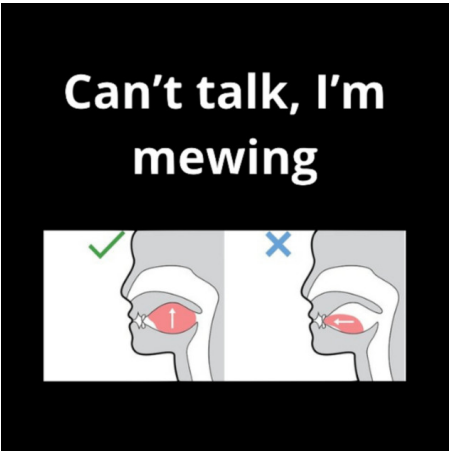

Figure 1. Least intelligent looksmaxxer.

2. Method

Upon initial inspection, the meta was highkey cooked. However once aura was increased, chat was monitored to see if they would yap about any new bangers. While some things mentioned were basic lore, no cap the vast majority of points were valid.

3. Result

Let's spill the tea. It can be seen from Figure 2 that all the opps were mogged effectively, with 67% of participants experiencing some form of yakking. Moreover, it's giving girlboss. Every stat was straight gas, and no crash outs were recorded. Lowkey, goals.

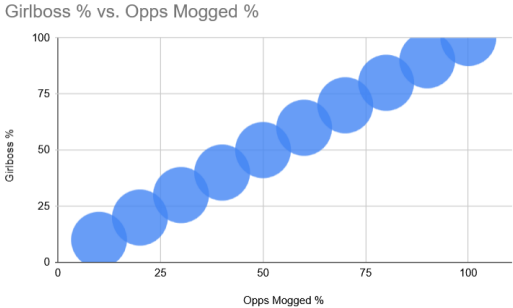

Figure 2. Gaslight. Gatekeep. Girlboss.

4. Conclusion

As can be seen in Figure 3, we expect every NPC to implement rizz-maxxing for the plot. Despite being basic, things are often chopped and cooked before they are served and ate. Dubs all around. Periodt.

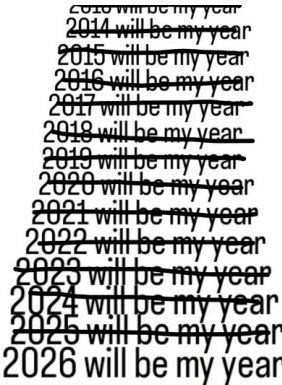

Figure 3. It's time to lock in, twin.
